EDUCATION

Moss Landing Marine Laboratories | CSU Monterey Bay, Moss Landing, CA

August 2020 – August 2024

Master of Science in Marine Science

Marine Landscape Ecology Lab, Vertebrate Ecology Lab

MS Thesis: "[Examining interesting habitat use of northwest Atlantic leatherback sea turtles \(*Dermochelys coriacea*\)](#)"

NOAA EPP/MSI GFP Graduate Fellow

January 2022 – December 2022

NOAA EPP/MSI Center for Coastal and Marine Ecosystems Graduate Scholar

August 2020 – August 2023

University of Virginia, College of Arts & Sciences, Charlottesville, VA

August 2014 – December 2017

College of Arts and Sciences | Bachelor of Science with Distinction in Environmental Science

School of Architecture | Minor in Global Sustainability

SKILLS

Technical: Experience with Microsoft Office Suite, Adobe (Photoshop, Lightroom, Illustrator, After Effects).

Experience with ArcGIS (ArcGIS Desktop, ArcGIS Pro, ArcGIS Online, ArcGIS Enterprise), MatLab, R, and Python.

FAA Part 107 Small Unmanned Aircraft System (sUAS) Pilot.

Health: Emergency First Aid, AED, CPR, and Emergency Oxygen Provider.

SCUBA: PADI Rescue Diver, >100 logged dives.

RELEVANT EXPERIENCE

Conservation Data Specialist, Division of Dam Safety and Floodplain Management,

January 2025 - present

VA Department of Conservation and Recreation, Richmond, Virginia

- Maintain and update GIS layers and enterprise geospatial applications supporting statewide flood risk and dam safety programs, including the Virginia Flood Risk Information System (VFRIS) and Dam Safety Inventory System (DSIS).
- Conduct routine GIS analyses and data management, as well as custom spatial analyses and web application products, to support internal agency needs such as reporting and planning.
- Use ESRI ArcGIS Enterprise and ArcGIS Online to develop and maintain GIS content; develop and maintain python scripts to promote reproducibility and automate data workflows.
- Design SQL queries against relational databases to support GIS content development, reporting, and data QA/QC procedures.
- Author and maintain workflow documentation, metadata, and user guides to support data and application lifecycle management and end-user adoption. Provide GIS data support and technical assistance to internal stakeholders and end users.

Product Development Specialist, Coastal Resilience Branch, NOAA NCCOS, Beaufort, North Carolina

September 2023 – January 2025

- Created and deployed a suite of data-driven coastal resilience products, including interactive story maps, dynamic data dashboards, and visually compelling infographics, to support stakeholders in understanding and managing risks related to coastal resilience.
 - Product samples:
 - [Marsh Impacts of SLR in the Northern Gulf of Mexico](#)
 - [Economic Impacts of SLR in the Northern Gulf of Mexico](#)
 - [HAB and Hypoxia Program Review website](#)
 - ESA Coral Data Viewer (internal)
 - Mission: Iconic Reefs Data Viewer (internal)
- Effectively used ESRI ArcGIS products (such as ArcGIS Pro and ArcGIS Online) and custom python scripts to summarize data and develop geospatial web applications using ArcGIS Online (ArcGIS Experience Builder, ArcGIS Dashboards). Used Adobe products (such as Illustrator) to develop custom infographics and communication materials such as one-pagers.
- Created clear and engaging data visualization products, using non-technical language to convey technical scientific concepts around inundation and sea-level rise to a broad audience. Ensured that GIS web applications and data products met Section 508 accessibility standards.
- Designed and implemented rigorous QAQC workflows to ensure data quality.

Masters Thesis Research on Spatial Ecology of Leatherback Sea Turtles, St. Croix USVI and Monterey, California

August 2020 – 2024

- Collaborated with federal and nonprofit partners to monitor leatherback sea turtle nesting activities. Deployed satellite tags on nesting female leatherbacks to track location throughout and after the breeding season.
- Used GIS (R and ArcGIS Pro) for analysis of tag data to characterize habitat use including: delineating important in-water habitats during the breeding season, identifying behavioral states, and determining environmental variables associated with movement.

Nina Mauney

mauneynina@gmail.com
(804) 477-5300
Richmond, VA

Observer, Upwell Turtles, Monterey, California

June 2021 – December 2022

- Participated in aerial surveys of sea turtles, marine mammals, and jellyfish, utilizing line-transect methodology.
- Performed assessments of leatherback turtle and cetacean distribution and density, prey distribution and density, and oceanographic habitat condition.

GIS Analyst, University Corporation, Monterey, California

August 2021 – July 2022

- Conducted GIS analysis in ArcGIS Pro, using geostatistical tools such as semivariogram assessment and kriging to create raster surfaces of carrier-specific cell coverage for California Public Utilities Commission.
- Developed and delivered workflow and QAQC documentation and training materials to client during training session.
- Created custom geoprocessing toolbox to increase project efficiency and accuracy.

GIS Specialist, Timmons Group, Richmond, Virginia

August 2020 – February 2021

GIS Technician, Timmons Group, Richmond, Virginia

September 2019 – August 2020

- Maintained and modified existing GIS databases using ESRI suite.
- Created spatial datasets for clients using ArcGIS, and converted data collected from field operations and surveys into GIS database using techniques such as coordinate geometry, keyboard entry of tabular data, manual digitizing of maps, scanning or automatic conversion to vectors, or conversion of other sources of digital data.
- Worked in client-facing role on several environmental resource management projects, communicating client needs to team and creating exceptional spatial analysis and cartography deliverables.
- Exceeded client-established quality control standards by executing rigorous QAQC processes, incorporating both manual inspections and Data Reviewer protocols.
- Created and delivered comprehensive training materials, reports, and presentations on GIS projects.

Teaching Assistant, University of Richmond, Richmond, Virginia

February 2019 – September 2021

- Assist with instruction in GIS Fundamentals, Advanced GIS, and Field Applications courses at the UR School of Professional and Continuing Studies. Led demonstrations in ArcGIS Pro, ArcGIS Online, ArcGIS Field Maps, ArcGIS Story Maps, ArcGIS Dashboards, and ArcGIS web maps.
- Create and present lessons, provide technical support, and assist with independent research projects.

Leatherback Sea Turtle Research Assistant, Sandy Point National Wildlife Refuge, St. Croix Sea Turtle Project/USFWS/NOAA, St. Croix, USVI

April – August 2017, 2018, 2019

- Led and participated in data collection through rigorous all-night field work including leatherback turtle tagging and genetic sampling.
- Communicated project goals and results through presentations and written media. Collected, maintained, manipulated, and analyzed project geospatial data using Microsoft Access/Excel, and ArcGIS. Completed data entry and QAQC of historic and current spatial and tabular data to ensure that data meets standards.
- Worked and lived cooperatively with a team of diverse backgrounds. Facilitated collaboration and conflict management.

Research Assistant and Part Time GIS Technician, Department of Geography and the Environment, University of Richmond, Richmond, Virginia

August 2018 – April 2019

- Managed and mentored eight undergraduate and high school interns. Organized and supervised interns' work and daily activities, managed and resolved conflicts, and fostered a positive group dynamic. Provided technical GIS training to students and interns.
- Facilitated and supported student and faculty research and classwork.

• **Kenya Settlement Scheme Project**

August 2018 – April 2019

- Performed GIS georeferencing, digitizing, and analysis of 1,600 smallholder settlement scheme maps for a [collaborative research project](#) with the London School of Economics (LSE) and the National Land Commission of Kenya (NLC).
- Automated geoprocessing operations using ESRI's ModelBuilder. Wrote workflows to document methodologies and communicate with collaborators. Designed and performed Quality Assurance/Quality Control checks on all project data.
- Prepared reports which included maps, summary charts, and notes detailing data processing history.

Coral Conservation and Reef Restoration Intern, Coral Restoration Foundation, Key Largo, Florida

January – May 2018

- Conducted in-water, intensive fieldwork restoring endangered *Acropora cervicornis* and *A. palmata* coral populations, including coral outplanting, offshore nursery maintenance, boating and trailering, and scientific monitoring of restoration successes.
- Conducted GIS analysis of restoration scope and success, and developed web applications to visually communicate non-profit goals.
